

MEGAN BRYSON

WHY ME IN UNDER 50 WORDS

Recent Master's of Computing grad at one of Canada's top 10 schools. Ten plus years of technical skills. Four plus years industry experience. Adoption forward, friendly, funny and a fast motivated learner focused on growth.

EXPERIENCE

Farm Credit Canada, Toronto (remote) – *Adoption Specialist Technical Analyst – Adoption Services*

SEPTEMBER 2025 – PRESENT

- Collaborate with various FCC teams to tailor solutions to their needs and address their unique problems
- Assess new technologies and aid in rolling out initiatives while minimizing employee discomfort
- Educate staff, with a wide variety of confidence levels, on tools available to them, with a focus on Microsoft Copilot
- Stay educated and up-to-date on bleeding edge technologies and how we can leverage them to align with company goals

Queen's University, Kingston, Ontario – *Research Assistant*

JANUARY 2024 – SEPTEMBER 2025

- Develop, implement and test a novel information diffusion algorithm in Python using the NetworkX framework
- Run large scale tests on the algorithm, collecting data about its efficiency and predictability
- Academic paper on the algorithm and my findings to be submitted to scientific journals in second half of 2025
- Graduate level TA for undergraduate courses in discrete mathematics and Python programming
- Mentoring and guiding undergraduate thesis students

Girl Guides of Canada, Toronto (hybrid) – *Digital Support Engineer and Training Specialist*

JULY 2022 – APRIL 2025

- Create/host company-wide training(s) for technical tools such as in house AMS for all Staff during migration
- Onboard and train all new staff, with a focus on new IT hires. Complete both digital tool and IT policy training
- Write IT policy as SME, consulting with various IT team members as well as Risk and Legal departments

EDUCATION

Master's of Computing, Research Stream – Queen's University

JANUARY 2024 – SEPTEMBER 2025

- 4.0 GPA
- Approached by Queen's University with an offer of fully funded degree
- Received exceptional grades in courses in combinatorial optimization, human-computer interaction, model-driven software development and more
- Completed graduate-level coursework as well as thesis research in graph theory, specifically information diffusion in complex networks
- Strong analytical and mathematical background

Honours Bachelor of Science, Computer Science with a minor in Psychology – Wilfrid Laurier University

SEPTEMBER 2017 – JULY 2022

TECHNICAL SKILLS

- 10+ years in experience Python (taken courses, TA'd courses and conducted research in)
- Completed hands-on course work in many languages including but not limited to: Python, C, OpenGL, Java, SQL, VBA, Swift, C++, Art, Assembly, JavaScript, as well UML-RT modelling
- Currently tinkering in REACT and Node.js in my spare time
- Experience in high-level, low-level, object-oriented and procedural languages
- Strong analytics thinking skills with a foundation in mathematics

AWARDS AND TALKS

- 2024 Ontario Volunteer Service Award
- CAN-CWiC Talk Presenter – October 2024
- Talk title: The Tortured Mathematics Department: A Graph Theory-Based Look at the Lyrics of Taylor Swift
- Women in Combinatorics Conference Presenter – July 2024
- Talk title: Information Diffusion in Complex Networks: A Proportion Based Approach
- The Canadian Applied and Industrial Mathematics Society – MTL 2025
- Upcoming talks: New England Section of Applied and Industrial Mathematics Society (UMass, 2026)

CURRENTLY WORKING ON

- The process of reformatting my thesis to submit for publishing to a journal/conference
- Assisting in more novel graph theory research, including doing *all* of the coding for the tests
- Mentoring several CS undergrads
